

## “DON'T FIND SAFETY BY ACCIDENT”

All Australian workplaces are subject to specific laws designed to **secure** the health, safety and welfare of workers and other persons at work and protect them from associated hazards and risks.

The MTA (NT) Work Health & Safety Management System encapsulates the legislative duties, rights, obligations of individuals and parties as per the following content;

- **Legislative Framework**
- **Consultation & Participation**
- **Risk Management**
- **Incident Response**
- **Emergency**
- **WHS Management System**

The cost is \$900 including G.S.T. for MTA members plus an annual fee of \$250 including G.S.T.

The primary benefits from implementing a WHS Management System include but are not limited to;

- **Creating safer work environments and the development of a positive safety culture.**
- **Demonstrating compliance with legal obligations in an effective manner.**
- **Reducing injury- and illness-related costs through pre-emptive or preventative action.**
- **Enhancing the organisation's reputation.**

MTA (NT) can assist your business, in conjunction with support from the Department of Business, in developing, implementing and maintaining a W.H.S.M.S.

Contact Rodger Sewell, in the first instance to attain further information and or to apply for subsidised implementation of a Work Health & Safety Management System.
